

**PAULO OLMEDO**

CURRICULUM VITAE

**STATEMENT**

Paulo is interested in people, the way people interact with space to create meaning, sustainability as imperative in fabrication and building, and understanding the complexity of economy that brings these things together. His aesthetic is influenced by his photography practice as a storytelling mechanism, construction of motorbikes as the deconstruction of social norms, and spending time outside with others and alone as a means to reset. He is forever seeking the subtle solutions that are born of a thorough process, and are open to a multiplicity of experiences.
