

TANGUY MARQUIS

CURRICULUM VITAE

STATEMENT

Tanguy is interested in the integration of sustainable strategies and fabrication techniques in architecture and beyond. He believes that in today's world, both of these components need to be an integral part of any project, and naturally lead to innovation and context specific design. His connection to the natural world and the built environment, coupled with an interest in parametricism and construction is articulated in a highly fluid and technical design process that results in sensitive and intricate architectural outcomes.

Born in the footsteps of the French Alps, Tanguy has a deep connection to the natural world. He draws upon the natural palette in studies of space, color, pattern, and texture. After moving to the United States, he was drawn to the landscapes of the West, where he currently resides.

EDUCATION & LICENSURE

- 2019 Registered Architect, Commonwealth of Massachusetts, January 2019
- 2016 Bachelor of Architecture: University of Southern California, Los Angeles
Study Abroad: São Paulo, Brazil & Mexico City, Mexico (2014)
